

## Linger

(from Elishah's album, *Nothing's Broken*)

**C**    **G/B**                    **Am7** **G**                    **F**  
Take this heart of mine, take this life You find  
          **Am7**                    **G**  
And mold it to Your will

**C**    **G/B**                    **Am7** **G**                    **F**  
Move in me tonight, please show me Your light  
          **Am7**                    **G**  
For You, Lord, I'll be still  
**Dm**                                    **F**  
Because I'm here, God, to see Your face...

**C**                    **G**                                    **F**  
Tell me You love me, show me Your mercy  
          **Am7**                    **G**  
I want to linger here with You now

**C**                    **G**                                    **F**  
My heart is broken, the veil is open  
**Am7**                    **G**  
Let me linger here with You now

**C**    **G/B**                    **Am7** **G**                    **F**  
Set my life apart, heal this broken heart  
          **Am7**                    **G**  
Use me once again

**C**    **G/B**                    **Am7** **G**                    **F**  
Make these eyes to see all Your precious glory  
          **Am7**                    **G**  
And wash up all this sin  
                                  **F**                                    **G**  
Lord, we praise You as You hold us in Your arms of love
